SUMMARY

Results-driven Software Engineer with 5+ years of professional experience specializing in web and backend development. Proven track record of transforming complex technical requirements into scalable, high-performance backend architectures. Highly proficient in building reliable web applications using Laravel and Java Spring Boot, backed by solid data management infrastructure utilizing PostgreSQL and MongoDB. Experienced in handling containerized deployments, managing cloud environments, and developing multi-tenant SaaS systems.

TECHNICAL SKILLS

- **Languages:** PHP, Java, Python
- **Frameworks:** Laravel, Java Spring Boot
- **Databases:** PostgreSQL, MongoDB
- **DevOps & Tools:** Docker, Proxmox, TrueNAS Scale, Git, RESTful API Development

PROFESSIONAL EXPERIENCE

PT. INOSOFT TRANS SISTEM | *Back End Developer* December 2022 – Present

- Architect, develop, and maintain high-throughput RESTful APIs ensuring seamless frontend integration and optimized system performance.
- Manage end-to-end server deployment and environment configuration across multiple production environments.

Freelance Technical Projects | *Full Stack & Web Developer* March 2026 – Mei 2026

- **Cari Kopi (SaaS Project):** Designed a multi-tenant coffee shop SaaS architecture integrating Xendit and Midtrans payment gateways with a secure Bring Your Own Key (BYOK) model.
- **Kamara Platform:** Engineered the core backend logic and database design for a specialized digital camera rental marketplace application.
- **Company & Public Dashboards:** Formulated responsive administration dashboards and landing pages, including a Waste Bank platform, an elementary school portal, and a professional practice licensing management system.

Inotive Technology | *Web Programmer* August 2022 – November 2022

- Built and deployed scalable web applications and engineered robust APIs supporting dedicated mobile application services.
- Executed routine server maintenance, security patching, and code optimization tasks.

PT. Bantubantuin | *Back End Developer* June 2022 – September 2022

- Designed and structured foundational RESTful APIs for the Bantubantuin ecosystem leveraging the Laravel framework.

PT. MEDIA KREASI ABADI | *Back End Developer*

February 2022 – July 2022

- Developed comprehensive backend APIs for core web and mobile deployments while overseeing operational server rollouts.

Institut Teknologi Kalimantan | *Full Stack & Back End Developer*

June 2021 – June 2022

- **H2H Mandiri Management Information System:** Spearheaded the development of a secure Host-to-Host (H2H) integration system connecting institutional services with Bank Mandiri using Laravel.
- **Inventory Management System:** Developed an internal web application to streamline digital asset and inventory tracking for the institution.

Institut Teknologi Kalimantan | *Assistant Lecturer*

February 2020 – January 2021

- Conducted hands-on practicum instructions for the Algorithm & Programming 1 courses utilizing the Python programming language.

EDUCATION

Institut Teknologi Kalimantan

Graduation: October 2022

Bachelor's Degree in Informatics
